Profile Summary

- Computer Science Engineering student passionate about Frontend Development and modern web technologies. Skilled in building responsive and interactive web applications using HTML, CSS, and JavaScript. Currently learning React.js and exploring component-based development.

Technical Skills

- **Languages:** JavaScript, HTML5, CSS3
- **Frontend:** React.js (Currently Learning), Tailwind CSS (Basic), Responsive Web Design
- **Tools:** Git, GitHub, VS Code, npm
- **Concepts:** DOM Manipulation, ES6 JavaScript, API Basics, React Components & Hooks (Learning)
- **Other Skills:** Prompt Engineering

Projects

JavaScript Mini Games Collection (JS GameHub)

- JavaScript-based collection of six interactive mini-games developed using HTML, CSS, and JavaScript, focusing on DOM manipulation, event handling, game logic, and responsive UI design

Expense Tracker Web Application

- Built a responsive expense management web application using HTML, CSS, and JavaScript with income/expense tracking, category & date filtering, and transaction management.
- Implemented Local Storage, edit/delete functionality, and dynamic monthly statistics for analyzing financial transactions.

E-Commerce Website

- Built a responsive e-commerce website using HTML, CSS, and JavaScript with product browsing, category filtering, search, product details, and shopping cart functionality.
- Implemented dynamic product rendering and cart management using JavaScript and DOM manipulation, with a responsive user interface for different screen sizes.
